

Tattoo and Body Piercing Overview

- The State of Ohio requires that a business that offers tattooing or body piercing services obtain approval from the local health department and operate in an approved / licensed establishment.
- The reason for involving the health department is to ensure that basic health and safety codes are met in attempting to prevent the transmission of infectious diseases during the performance of tattooing and body piercing.
- The Trumbull County Combined Health District seeks to promote optimal community health through education, prevention measures, public awareness and regulations.
- For licensing in the city limits of Warren 330-841-2612. All other locations must register and obtain licenses through the Trumbull County Combined Health District.
- For details of regulations see [OAC 3701-9](#) and [ORC 3730](#).
- Establishment renewal applications are mailed in November and are due by December 31st of each year.
- Call the Trumbull County Combined Health District (330-675-2489) for more details.
